

TONONE

PROJECTS

ABOUT TONONE

How can we apply our fascination for traditional mechanics and craft tools into state-of-the-art design? This quest was the starting point for the products of lighting label Tonone, known for the use of characteristic construction tools as a visual and a functional basis for innovative product design.

This vision was well illustrated by the design of the Tonone-line up: the Bolt-series, followed by the hand-blown glass series Atlas and Ella, the sturdy lamp Mr. Tubes and the LED serie Beads. In 2022, Tonone added two new series to its collection: the elegant Bella and the portable ONE. The Bridge linear LED lamp was launched in early 2024.

Tonone was founded in 2013 by designer Anton de Groof and is based in the Netherlands. The Tonone design team works with local artisans to produce their products. During the design and manufacturing process, the entire life cycle of the products is taken into account when it comes to sustainability, efficiency and logistics.

LEXSON

Lexson is a distributor of fashion and lifestyle brands based in Princenhage - Breda in the south of the Netherlands and the centre of the Benelux.

With 2 beautiful showrooms, they welcome their customers in the best possible way. With their sleek, minimalist labels, mainly from Scandinavia, they serve some 750 fashion shops.

A former Solex garage and furniture factory has been converted into two fashion showrooms. The interior is best described as industrial minimalism with a warm feel.

Tonone's Beads Pendant lamps fit perfectly above the kitchen island because of their elegant and minimalist look. The Beads floor lamp and table lamp have also been used in the interior. As an eye-catcher, the Bella table lamp in Striking Orange is used.

GULF

Studio Vennix created a warm and quirky office design for Gulf Gas and Power that perfectly matches the company's identity. Despite Gulf's focus on energy trading, they manage to create an energetic look themselves.

The striking colors Striking Orange and Thunder Blue form a beautiful harmony with Gulf's corporate identity.

The choice of Tonone as lighting is seamlessly integrated into both the aesthetics and functionality of the space. The end result is not only a professional office environment, but also a source of positive energy and creativity.

For this project, the Bella Pendant was chosen, executed in Striking Orange & Thunder Blue colors, fitted with a brass fitting.

CAPCABIN

CapCabin develops sustainable, fully insulated tenthouses that look like luxury safari tents and are intended for residential recreation. They combine the safari feel with the comfort of a house, where both the tenthouse itself and the natural surroundings and furnishings are important.

CapCabin consciously chose Tonone's Bolt design lamps. In CapCabin's opinion, these fit perfectly with what CapCabin is looking for in the interior for the tent houses: the Bolt design lamps are sturdy & robust and at the same time equipped with refined details. The Bolt lamps at CapCabin come in the color Flux Green.

The Tonone ONE is also added to the interior plan. How nice is it that you can use one single lamp at different places. For example outside by attaching it to a sturdy chestnut wooden pole so that you also have (reading) light when you sit outside.

JM VAN DELFT & ZN

JM van Delft & ZN supply and assemble windows, doors and façades in aluminium, steel and stainless steel since 1907.

The familybusiness works mostly with local companies and sustainability plays a big role. This is how the company came into contact with Tonone.

In the JM van Delft & ZN Office is the design pendant lamp Mr. Tubes LED Connect a real eye-catcher. An amazing construction of lamps and light. You can see the design wall lamps Mr. Tubes LED Wall and the Bolt Wall Sidefit Mini in the color Pure White.

THEATER DE KATTENDANS

The Kattendans is a theater that attracts well-known artists. Architect Peer Bedaux designed the building in the early 1990s. In 2022, the entire project was renovated.

While retaining the characteristic planes and lines of De Stijl, Diederendirrix gave the building a new and more spacious look.

The Kattendans consists of a theater, foyer and several multifunctional rooms used by local associations.

Several lamps from Tonone were used in this project: the Bolt 10-pack Pendant, Bolt Table, Beads Pendant, Beads Wall and Beads Floor.

NIKON

Nikon Europe's headquarters has been transformed by Buro Now into a hybrid and dynamic working environment. The new interior offers a wide variety of spaces for every type of work, including offices, meeting rooms and concentration workstations.

When selecting materials and products, Buro Now made sustainable choices and reused a lot of furniture. For example, CO2 negative and neutral carpet tiles were used, the furniture was produced locally and Tonone design lamps were installed.

The Beads wall 35 Downlight is hung on the walls and the Beads Pendant is chosen for the ceiling. Attention was paid to selecting products with a sustainable nature and low environmental impact.

The Tonone Beads collection is designed to fit in every environment. The modest look of the armature, shines when it comes to functionality. With the rotating and tilting LED-ring, the dimmable Beads is a solution for any situation.

MORGAN & MEES

Morgan & Mees is a combination of a boutique hotel, restaurant and cocktail bar. Located in Amsterdam Old-West, close to Amsterdam's most vibrant and artistic neighbourhoods. A social crossroad for international travelers and local residents.

The monumental building dates from 1800. The owner was inspired by her favorite city Paris and interior designer Anne Claus has translated this into a combination of vintage and contemporary design elements and furniture, creating a balance that is both classic and fresh.

The impressive Bolt Chandelier 18 arm design lamp hangs prominently in the restaurant. The Bolt Chandelier 6 arm has been given a beautiful place in the hotel.

CONTACT

Are you a professional in interior design and architecture?
Tonone is happy to help you. For advice, custom solutions,
various tools (including 3D files) and a fixed point
of contact, please get in touch with us.
